

# Revolutionary Problem Solver – MAXX GAP SOLUTION

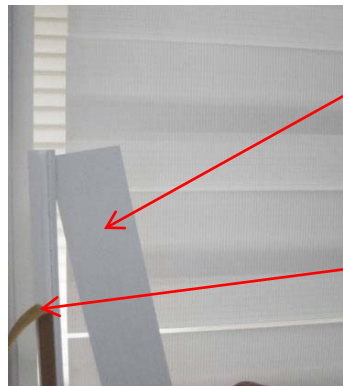

## Miracle Fit (Patent Pending)

When you have a shortage (gap) not only on the fabric but also on the cassette, (gap in picture exaggerated), you can use the Miracle Fit Base (Item # 1) along with the scored Extension (Item # 2) to fill the gap.

The cassette is touching the wall and the only gap is between the fabric and the wall. The Miracle Fit base (Item #1) and Extension (Item # 2) will allow you to fill in unnecessary gaps between the product and the wall by scoring the extension (Item # 2) from 1/2" to 1 1/2".

Scored Adjustable Extension (Item # 2) to snap on Item # 1 after being scored to desired size

Base (Item # 1) with tape ready to install

Item # 1 and Item # 2 shown in full 1 1/2" dimension before being scored to size

Item # 1 and Item # 2 showing all the multi scoring sizes

Item # 1 with tape ready to be glued onto the side of the frame in line with the blind

## Miracle Fit Specifications:

1. Available in Cotton colour only.
2. Miracle Fit comes in a two piece set always, Miracle Fit Base and Miracle Fit Extension.
3. Two sizes of Miracle Fit:
  - STANDARD – 1" overall size including the base. Base ONLY is 1/2". On Extension you have 3 score lines 1/4" a part so that you can trim to desired size.
  - OPTION – 2" overall size including the base. Base ONLY is 1/2". On Extension you have 7 score lines 1/4" a part so that you can trim to desired size.
4. Price of Miracle Fit at the time of order with custom shades or custom blinds is \$1.20 NET per Linear Foot.
5. Price of Miracle Fit if order by 15' lengths is \$1.80 NET per Linear Foot and a minimum of 60' has to be ordered at any one time.
6. For Installation the Miracle Fit Base has two sided tape attached to it that is peeled off when installing on the inside of the window trim. If necessary silicone can also be used around the edges of the base or screws can be drilled through the back lip of the base for extra support.
7. Optimum positions for installing the Miracle Fit is either directly behind the fabric of the shade or parallel to the fabric of the shade depending on the needs of the customer. The Standard 1" Miracle Fit will be used the vast majority of times as gaps on the sides of the shades or blinds rarely exceed 1".
8. For shipping and packaging purposes, when the Miracle Fit is ordered with shades or blinds at the time of order the Base will be cut to the maximum width of the blind and you may have multiple pieces of the Base being sent depending on the height of the shade ordered but the Extension will always be the full height of the shade or blind ordered in one full length piece.
9. When ordering the Miracle Fit please keep in mind that you are ordering two times the height of the shade as it goes on both sides and we will round up to the nearest foot. If a Miracle Fit Sill Option is required then you require two times the height and one time the width of the shade to be ordered for the Miracle fit.
